DPSCM 4155.6 SUBSECTION 218.2

DSCP-HR May 03

DESTINATION (SURVEILLANCE) INSPECTION Entomological Laboratory Identification Services

I. REFERENCE.

- A. DLAM 4155.5, Quality Control Depot Storage Standards, Appendix S, Subsistence.
- B. MIL-STD-904, Department of Defense Standard Practice: Guideline for Detection, Evaluation and Prevention of Pest Infestation of Subsistence.
- II. <u>PURPOSE AND SCOPE</u>. To provide procedures for submitting insects, found in infested food products and food storage areas, to military entomological laboratories. This procedure is applicable to inspectors at all food storage facilities containing Defense Supply Center Philadelphia (DSCP) owned, * transported, and/or procured stock, at either Continental United States (CONUS) or overseas locations.

III. PROCEDURES. Inspectors shall:

- A. Prepares Section A Request for Test, DD Form 1222, Request For and Results of Tests in accordance with MIL-STD-904, Guidelines for Detection, Evaluation and Prevention of Pest Infestation of Subsistence as follows:
- 1. Indicate in Block 16 that a telephonic report of the specimen identification is required. (This information shall be furnished by the entomological laboratory to the requesting inspection office and confirmed by normal distribution of completed DD Form 1222).
 - 2. Enter in Block 17:

Same as Block 2 with copy to: Commander Defense Supply Center Philadelphia ATTN: DSCP-HROS, Bldg 6 700 Robbins Avenue Philadelphia, PA 19111-5092

B. Contact by telephone the closest laboratory (Encl 1) to ensure an entomologist will be at the activity to identify the specimens when they arrive by mail. When possible, local entomologists may be utilized to prevent unnecessary delays and shipping expenses.

This Subsection 218.2 supersedes Subsection 218.2, 14 Dec 99

DPSCM 4155.6 SUBSECTION 218.2

- C. Forward insects, found to be infesting a product, in appropriate container, accompanied by DD Form 1222 (Section A completed), to designated laboratory (refer to Enclosure 1). Minimum preserving, packing, and shipping techniques for this procedure follow:
- 1. Adult Insects. Place the specimen(s) between pieces of tissue paper (do not use filter paper or cotton) in a standard petri dish (NSN 6640-00-051-9495) or other appropriate container. Care must be taken to ensure that sufficient tissue paper is used to prevent movement of the specimen(s) due to excess tissue paper. Secure the lid to the container with tape and label as to collection location or source. Complete packing as described in paragraph III.C.3.
- 2. <u>Immature Insects</u>. Place immature stages in screw cap vials (NSN 6640-00-408-2200 (9 ml) or NSN 6640-00-408-2300 (23 ml)), containing 70% alcohol solution and label as to collection location or source. Complete packing as described in paragraph III.C.3.
- 3. <u>Packing Instructions</u>. Place vials or petri dishes together with DD Form 1222, (Section A completed) in specimen shipping container (Box, Setup, Mailing, Dental, Large, NSN 8115-00-511-5750), or other appropriate shipping container containing adequate packing material to provide protection for the vials or dishes during shipment. Tape lid after closure and address to appropriate laboratory.

BY ORDER OF THE COMMANDER

DISTRIBUTION Special

DESTINATION (SURVEILLANCE INSPECTION) ENTOMOLOGICAL LABORATORY IDENTIFICATION SERVICES

I. <u>LABORATORIES SERVICING CONUS INSTALLATIONS.</u>

A. Specimens can be sent to any of the laboratories listed Below for identification.

1. USACHPPM - N

4411 Llewellyn – MCHB-AN-ES

Fort George G. Meade, MD 20755-5225
